

Synthetic Organic Chemist

CanAm Bioresearch is a well-established pharmaceutical contract research organization located in Winnipeg, Manitoba. We specialize in pre-clinical discovery and development and provide bioanalytical, pharmacokinetic, pharmacology, and custom chemical synthesis services.

Description:

The main task in the Chemistry Group is to design and synthesize new chemical entities for biological evaluation as potential therapeutic agents. For projects requiring a Project team, the Scientist will report to the Project Leader.

Duties and Responsibilities:

1. Providing project proposals for the design and synthesis of new chemical entities.
2. Carrying out scale-up synthesis of key target molecules.
3. Compound purification (HPLC) and identification and familiarity with modern spectroscopic techniques (NMR, MS etc.).
4. Providing periodic project reports.
5. Performing duties in a safe manner in keeping with the Health and Safety Act.

Interactions:

Participates in scientific interactions with in-house and external collaborators regarding scientific matters.

Qualifications:

1. Ph.D. in Organic Chemistry, Medicinal Chemistry or a related field or equivalent industrial experience.
2. Strong background in synthetic organic chemistry as well as familiarity with modern analytical, purification and structural characterization techniques.
3. Industry or related experience.
4. Good oral and written communication skills.
5. Approved work status in Canada.

Compensation:

- Starting salary negotiable depending on experience
- Full benefit package offered that includes health and dental care

Deadline:

The application deadline is October 31, 2016
